Creativity is the heart of music. That's the reason Moog® synthesizers are designed with the open system concept—more inputs and outputs to let you expand your musical horizons.

Moog Accessories open the synthesizer's musical possibilities even more. Using a Moog Percussion Controller, Ribbon Controller, Sample and Hold, or any of the others will add new dimensions to your playing technique and style.

Connect these Accessories to Moog's open system synthesizers and be prepared to explore new sound frontiers.
