

A MOOG DIALER?

Moog's diversified talents enable us to handle a full range of activities associated with the electronics industry including products for Eastman Kodak, Fisher Price and the Tandy Corporation. Recently we entered the telecommunications field to provide a computerized, cost effective telephone dialer and we would like to make it available to our most valued customer — YOU!

The Phone Controller is a great product for keeping your musical associates, agents, friends and family close at hand. Here are just a few of the features:

SMART DIALING: Dials 30 numbers of up to sixteen digits automatically with a single touch. Dials touch-tone calls in under three seconds! Also works with rotary phone systems without paying for touch-tone service.

Extensive redialing capabilities allow you to: Redial last number, access busy numbers quickly, or program an automatic redial once a minute for up to fourteen minutes! Great for hard to reach or frequently busy numbers.

SAVES TIME AND MONEY: Bright LED display times your outgoing calls, displays number dialed or the time of day.

FEATURE PACKED: A handy internal speaker may be turned on for group listening. "HOLD" feature provides multi-line privacy on single-line phones.

UNIQUE CONSTRUCTION: High technology touch-sensitive keyboard and memory panel has convenient "four corner" emergency storage locations. Dials emergency numbers in the dark! Completely sealed switches for years of trouble free operation. UL and CSA approved. FCC registered.

EASY INSTALLATION: Owner installation on modular single line phones in seconds. Multi-line (ML) version for most office systems includes RJ-35X adapter and special cord (must be installed by the telephone company or interconnect company and may require a one time installation charge).

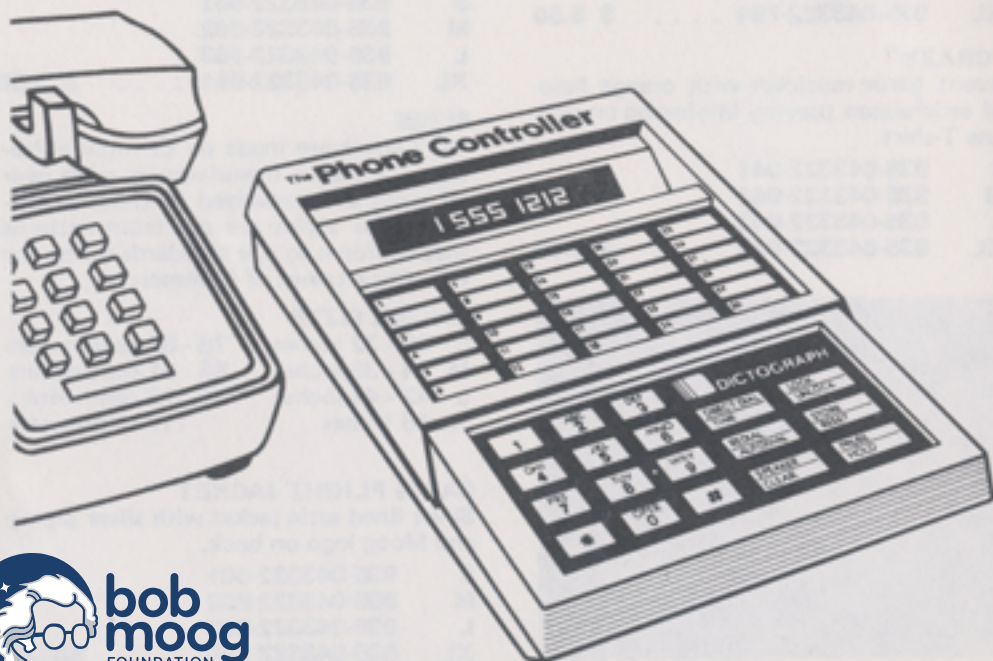

The suggested list prices may be reduced by \$10.00 by ordering any clothing item from our general software catalog.

MODEL PC-30 \$129.95

MODEL PC-30 ML 149.95

Export customers will require a locally purchased 12 volt 450 milliamp DC power supply and may be subject to local telephone line restrictions.

Model PC-30 and Model PC-30 ML supplied with 120 volt/60 hz. power adapter.

CHARTING OUT NEW SOUNDS

ACETATES, SOUND CHARTS AND BLANK SOUND CHART PADS

Moog makes it easy to find your way around the synthesizer panel as well as map out your own unique sound discoveries. Acetate overlays fit right over the control panels of the Micromoog and point out just where to set each dial for popular sounds. The Minimoog Sound Charts Book accomplishes the same by mapping out different settings on a series of different panel illustrations. Meanwhile, if you discover your own sounds, pull out a blank sound chart book and simply indicate with an arrow where each of the illustrated controls should be set. There are blank sound chart pads for the Minimoog, Polymoog, Prodigy, Liberation, and Opus 3.

OWNER'S MANUALS

Moog owner's manuals are complete synthesizer courses in themselves. They not only help you master the concepts behind every kind of synthesizer, they also help you shop intelligently, because you learn what each different synthesizer specifically has to offer. Each manual has easy to follow, step-by-step instructions, explanations, sound charts and illustrations, so it's easy reading even if you don't have the synthesizer to refer to.

SYNTHESIS

One of the most influential people in Dr. Moog's circles when he began developing the synthesizer was Herb Deutsch. In fact, it was Herb who took Dr. Moog to the electronic music concert that initiated Moog's avid interest in making an instrument for such music. Synthesis, a thick paperback book is an introduction to the history, theory and practice of electronic music. Needless to say, this is an informative book by one of the most foresighted synthesizer experts of our time.
